

Arch Chemicals, Inc., located in Alpharetta, GA, is seeking qualified candidates for the following position Applications Specialist supporting the Industrial Biocides and Building Products business segment.

Major position responsibilities:

Manages testing conducted by laboratory technicians. Interprets experimental data, prepares summaries in report format, and conveys report conclusions to customers. Represents Arch in the context of the coatings industry groups.

- Travels to visit external customers, and acts as technical liaison between customers and departments within Arch by coordinating in-depth technical support.
- Works directly with customers to troubleshoot plant hygiene, biocide stability or compatibility problems and to maintain existing materials protection business.
- Acts as principal researcher and investigator in areas of specialization, and is assisted by technical and non-technical support staff.
- Works directly with customers and with Arch personnel in identifying new product development opportunities.
- Works with project teams to bring these opportunities to fruition. Interfaces with Sales, Marketing, Customer Service and technical groups within Arch Chemicals.

Position requirements:

Qualified candidates will be those who meet the criteria listed below:

- Experience in coatings technical service or product development **required**.
- M.S. Degree in Chemistry or related field preferred.
- Candidates with a B.S. degree and 5+ years' experience will be considered.
- Customer relationship management, planning, organizing and implementation skills required

Qualified and interested candidates should email resume to joboppalpha@archchemicals.com or mail resume to Arch Chemicals, 1200 Bluegrass Lakes Parkway, Alpharetta, Georgia 30004. Resumes must be received by Monday, June 20, 2011. No walk-ins or recruiters please. For more information about our organization, visit our website at www.archchemicals.com.
